

WEARABLES (GARMENTS | COSTUMES | ACCESSORIES)

definition. an item that can be worn.

i make wearables using fabric that i have designed and printed myself, or a combination of fabrics that i have sourced alongside fabrics i have designed myself.

printed / painted fabric can be commissioned and bought by the metre (see commissions process)

*please note that there are different costs for one-off bespoke designs and replicated designs (something i have made before).

if you have an item you love i can make a garment based on it's shape and fit

i can also adapt / rework existing items of clothing

IS THIS A COLLABORATION OR COMMISSION?

COLLABORATION

initial email enquiry

followed by phone call or in-person meet to discuss your ideas and how you envisage us working together.

chat about budget, timeline and desired outcomes.

COMMISSIONS

initial email enquiry

followed by chat to get a feel for what you'd like to commission.

things to consider:

themes you'd like to work with

what scale / number of pieces

material choice (*material costs are additional and not included in design fee)

method of production (printed | painted)

budget for the piece

DESIGN PROCESS:

design (costs vary for bespoke or replicated designs).

images of the initial design will be sent to you / followed by initial design review

i invite feedback on initial designs. i'm happy to make amendments but i ask that you are respectful of the time invested and creative energy this takes.

measurements*. please follow the measurement chart found [here](#). your measurements can be emailed to me directly.

additional costs:
fittings*
alteration costs*
redesigns*

ALTERNATIVE PRICING STRUCTURES ARE AN OPTION.

payment in installments. payment can be split into more manageable installments in line with an agreed payment plan.

skill-sharing, swaps or exchanges – do you have a skill, a product or service that we could exchange like for like?
